

Novoseal: Splittable Microduct Endstop – 2018-10-12

#### **NOVOSEAL: SPLITTABLE MICRODUCT ENDSTOP**

#### **PRODUCT DESCRIPTION**

This product is a divisible endstops for cable filled microducts.

The seal is specially designed to safeguard the water tightness with these products. The colour of the seal depends on the size of the cable that can be installed.

There are 2 configurations available.

The type A for small diameters, from 4 to 10mm. It is a slim and space saving design.

The type B for bigger diameters from 10 to 20mm. This one is more robust, suitable for DB applications.

#### **APPLICATION AREA**

The Novoseal – splittable microduct endstop will be used to seal the space between microduct and the cable. The application is typical for using it in an underground manhole application to prevent water in the pipe network. The type A is a "light configuration" for above ground application". The type B is a stronger product with higher impact resistance.

Application temperatures: as from -15 °C.

#### **PRODUCT FEATURES**

Splittable (support and seal)

- Water tight up to 0,5 bar
- Gas tight up to 0,5 bar (14 days test)
- Compact design
- Suitable for low temperature installation
- Easy installation
- Small number of components

Accessible & Watertight Solutions for latest generation telecom networks

Novoseal: Splittable Microduct Endstop – 2018-10-12

#### **FOR TYPE A PRODUCTS**

#### **PRODUCT COMPONENTS**

<u>Part Description No of parts</u>

A. Plastic housing 1 B. Rubber seal 1

Different seals are available depending on the cable installed.

#### **PRODUCT VARIATIONS**

Products is available for 4, 5, 7, 8 and 10mm microducts for cable sizes from 0.9 - 4 mm in diameter see the table below.

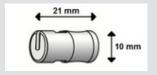

Other sizes are on request

#### **PRODUCT SPECIFICATIONS**

Material

Plastic housing : Polycarbonate

Seal : TPE

#### **Dimensions**

Duct size OD [mm]	Cable diameter [mm]	A [mm]	B[mm]	Weight [g]	Wavin article no

	3,7-4,0	24	15	20	4065343

Colour

Scales + keys : Black

Seals : Depends on the size of the cable

#### **PRODUCT PERFORMANCE**

Gas tightness : 0,5 bar 24h Water tightness : 0,5 bar 24h

Impact resistance : not tested (not relevant for application above ground in street cabinets)

Pull out force pipe : from 4 to 7mm > 20N; 8mm > 50N; 10mm > 100N

Pull out force cable : depending on cable

#### **INSTALLATION**

For installation method we refer to the quick reference manual for this in every product bag.

#### **FOR TYPE B PRODUCTS**

#### **PRODUCT COMPONENTS**

Part Description No of parts

A. Plastic scalesB. Cutting blocksC. Rubber seal1

Different seals are available depending on the cable installed.

#### **PRODUCT VARIATIONS**

Products is available for 10, 12, 14, 16, 18 and 20 mm microducts for cable sizes from 1,0-12 mm in diameter see the table below.

Novoseal: Splittable Microduct Endstop – 2018-10-12

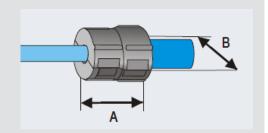

Other sizes are on request

#### **PRODUCT SPECIFICATIONS**

MATERIAL

Plastic scales : glass fibre reinforced polyamide Cutting blocks : glass fibre reinforced polyamide

Seal : TPE
