

## NOVOSEAL PIPE CAPS + PE PROTECTION CAP

### PRODUCT DESCRIPTION

Flexible cap with good mechanical properties for temporary closing pipe ends or assemblies.

Two types are available:

1. Novoseal pipe cap \_Made of flexible PVC
2. PE projection cap \_Made of LDPE

*Novoseal pipe cap*

### APPLICATION AREA

The cap are used to seal and protect (temporary) end of microducts, optoducts and assembly ducts.

For short term, the use of caps direct buried is no problem. In case long times are expected it is advised to use a water tight solution.

### PRODUCT FEATURES

- Easy to apply due to flexibility
- Internal ribs provide tight fit and release pressure build up.
- Good chemical resistance
- Caps for microducts 4 – 20 mm and optoducts 25 – 63 mm

*PE protection cap*

### PRODUCT PERFORMANCE

Good chemical resistance against water, oil, fat and strong acids.

Flexible

### PACKAGING

Fittings / bag : 250 pieces / bag for diameters until 20 mm  
: 50 or 100 pieces / box for other diameters, depending on type

## PRODUCT SPECIFICATIONS – PE protection cap YL
