Upgrade to a Versiv™ now!

Trade in your cable tester* for a brand new member of the Versiv Cabling Certification System and save up to NOK 37,000.

A recent customer survey amongst several hundred Installers indicated that those that have deployed Versiv and LinkWare™ Live in their organization have experienced a 10% increase in earnings per completed job. At the same time they reported productivity enhancements in the area of troubleshooting in excess of 65%. Get smart too and upgrade to a Versiv now.

GET SMART. GO VERSIV.

With LinkWare Live SaaS you manage certification jobs anytime, anywhere, with anyone on any device.

*Qualifying trade-ins include all cabling certification tools, any make, any model. Production of the DTX-1800 has ceased on June 30, 2015. Service and support on the DTX-1800 is guaranteed until June 30, 2018.

VERSIV™
Cabling Certification System

Upgrade to a Versiv™ now!

IT'S AS EASY AS...

1

Place an order for the "/T" of your choice (by doing so you in fact immediately place an order with the cash back rebate already deducted from the list price of the chosen instrument).

2

Go to www.dsxdeal.com immediately after receiving your new tester to print the shipping document and label for your old cable tester. **IMPORTANT:** The shipping document contains a unique ID with which we track your shipment once it arrives in our warehouse.

3

Ship you old tester within 1 week of receiving your new instrument. Within the European Union: Return your old cable tester to Fluke Networks accompanied by the shipping document. Outside the European Union: return your old cable tester with the shipping document to the distributor from whom you have just purchased your new tester.

Terms & Conditions

- Through the purchase of a "/T" configuration you will have received the cash-back rebate at the moment of order placement. If the old tester is not returned to Fluke Networks, we will invoice your distributor the amount of the trade-in after which the distributor will invoice you.
- The customer is responsible for shipping the old tester, within 1 week of receipt of the new "/T" in accordance to the 3 steps listed above.
- A print-out of the form on www.dsxdeal.com needs to be inserted in the box in which the old tester is shipped so we can register its receipt correctly once it arrives in our warehouse. Per "/T" purchased a form needs to be completed.
- As a trade-in unit we will accept old cable testers, any make, any model,

that can certify copper and/or fiber networks according to industry standards. The returned testers must have a similar "basic" functionality as what you are purchasing. We only accept trade-in units that turn on, although the returned module(s) or instrument(s) may be defective.

- This offer is valid in Europe, the Middle East and Africa through participating distributors only, on made purchases between August 29, 2016 and December 23, 2016.
- This trade-in promotion may not be used or combined with any other promotion or special discount offer (including the "DealMaker")
- This offer is subject to change without notice.
