## Standard Remote Control Unit

Ergonomic and Intuitive Remote Control

### The User is Now in Control

The Motorola NYX remote control is designed for today's interactive home and provides an intuitive and user-friendly entertainment experience. The NYX is ergonomically designed for simplicity and ease of use. The thumb naturally falls on the navigation area and function keys are easily reached allowing for quick and easy access to the most vital features such as navigation and main functions. With NYX the user will feel that they are truly in control of their home entertainment experience.

### Navigate

Function keys on the NYX remote are intuitively grouped together so you can always find the function you're looking for. User navigation areas are differentiated by height, shape and size further enhancing non-visual interaction with the device and leaving little room for misinterpretation or accidental input.

The NYX has an easily located "Back" key facilitating quick and easy correction to escape from undesired Set-top-Box (STB) function activation.

### Simply NYX

The simplicity of the device enhances the dialogue between the user and the STB increasing the ease of use in relation to efficiency and user satisfaction.

Volume controls have been dedicated a special area on the side of the remote control. The three keys, volume up, volume down and mute can easily be reached and are coded by shape to allow tactile navigation.

To allow the user more freedom when operating the remote control, a clever IR hardware design has been implemented. This design, in combination with a performance increase of the IR protocol, result in superb IR capabilities.

For more information regarding any of these features contact your Motorola sales representative.

## DATA SHEET

NYX Standard Remote Control Unit

# Specifications

### PHYSICAL

Dimension:	142 x 41 x 21 (mm)
Keys:	22 rubber keys, 11 plastic keys with metal dome
Operating distance:	Point to target > 10.0 m
Directional limit:	45 degree at 3m, 15 degree at 7m
Battery:	2 pcs. AAA

### COMMUNICATION

Infrared (36kHz)

### IR-PROTOCOL AND IR-CODES

Motorola proprietary

### SUPPORTED PRODUCTS

VIP1903, VIP1963, VIP1003, USB120IR
