

MICROBUNDLES

FuturePath ECO 7x14/10 mm

A bundle of MicroDucts which use up to 100% reground High-Density Polyethylene (HDPE) from Dura-Line's own internal manufacturing process. FuturePath® ECO contributes to lower scope 3 emissions for network operators and is suitable for direct-buried or sub-duct installation in outdoor optical communications networks. All standard MicroDuct sizes and bundle combinations are available, and all products meet stipulated parameters for regular MicroDuct products.

- Made from up to 100%, high-quality, reground HDPE
- Sheath and coloured identification stripes may use regular or reground materials
- Available in configurations starting from 2 MicroDucts, with sizes ranging from 7 mm to 20 mm Outer Diameter (OD)
- Sheath is easy to remove for quick access to individual pathways
- Suitable for underground installation via common duct deployment methods (trench, MicroTrench, pull, directional drill, plough)
- Branching is simple with a DuraFit connector
- SILICORE®, permanently lubricated, coextruded, regular HDPE-based inner lining provides a lower inner coefficient of friction (<0.1) for maximum cable blowing length
- UV resistance up to 2 years in Central European climatic conditions, depending on customer specified requirements
