today

**Promotional period: 01.09.2026 – 18.12.2026**

Limited-time savings on best-selling fiber and copper certification and troubleshooting solutions. Choose the tools that match your workflow.

### CertiFiber™ Pro Quad OLTS Kit

A complete solution for fast, accurate certification of singlemode and multimode fiber links to industry standards.

Category: Fiber  
Item no. 4955805  
Part no. CFP2-100-Q/GLD INT

**Save 47,000 SEK**

### OptiFiber™ Pro OTDR Kit

A troubleshooting and extended testing solution that locates faults, loss and reflections in fiber links.

Category: Fiber  
Item no. 4955462  
Part no. OFP2-100QI/GLD INT

**Save 47,675 SEK**

### CertiFiber™ Pro Add-On Kit

An upgrade kit that adds fiber certification capability to an existing Versiv™ mainframe and remote test setup (for use with DSX-5000 and DSX-8000 series).

Category: Fiber  
Item no. 4334851  
Part no. CFP-Q-Add

**Save 42,775 SEK**

### DSX2-5000QI CableAnalyzer™ Kit

A copper and fiber certification and inspection for testing networks up to 10 Gigabit Ethernet.

Category: Copper and Fiber Kit  
Item no. 4955074  
Part no. DSX2-5000QI/G INT

**Save 57,068 SEK**

### DSX2-8000QI CableAnalyzer™ Kit

A high-performance copper and fiber cable certification and inspection solution designed for high-speed networks.

Category: Copper and Fiber Kit  
Item no. 4954687  
Part no. DSX2-8000QI/G INT

**Save 62,289 SEK**

### DSX2-8000QOI CableAnalyzer™ Kit

An advanced all-in-one certification kit combining copper and fiber certification, OTDR troubleshooting and fiber inspection in a single solution.

Category: Copper and Fiber Kit  
Item no. 4954610  
Part no. DSX2-8000QOI/G INT

**Save 126,355 SEK**

### DSX-602-PRO CableAnalyzer™ Kit

Essential test and certification solution for twisted pair structured copper cabling up to Cat 6A with fast 10-second tests.

Category: Copper  
Item no. 6008226  
Part no. DSX-602-PRO/GLD

**Save 22,434 SEK**

Savings shown against regular list prices. Savings vary by configuration. More offers available on Page 2.

Talk to Fluke Networks to build your confidence and consistency in every fiber and copper installation.

### DSX2-5000 CableAnalyzer™ Kit

High accuracy network test solution offering comprehensive standards compliance and certification up to Cat6a and Class FA.

Category: Copper

Item no. 4955017

Part no. DSX2-5000/GLD INT

**Save 32,350 SEK**

### DSX2-8000 CableAnalyzer™ Kit

High-performance copper certification up to Cat8 and Class I/II for the most demanding networks.

Category: Copper

Item no. 4954550

Part no. DSX2-8000/GLD INT

**Save 54,164 SEK**

## Why choose Fluke Networks?

From enabling hyperscale data centers to connecting transportation, utilities, smart cities and renewable energy infrastructure, fiber and copper networks are the backbone of the world's most critical projects.

When failure isn't an option, professionals rely on Fluke Networks to deliver measurements they can count on – no matter if it's carrying out diagnostics in the harshest climates to certifying the largest data centers.

Every test matters, and every result determines the resilience of vital communications.

Our fiber and copper solutions are rigorously tested to offer reliable performance and accuracy, ensuring you are ready for anything that your network demands today, and in the future. With our advanced test tools you can:

- Certify fiber and copper faster with confidence
- Reduce retesting, rework and costly call-backs
- Deliver professional reports that build customer trust
- Scale easily as networks grow in speed and complexity, starting with Cat 6A copper to next-generation fiber

From offshore wind farms to smart cities, Fluke Networks has you covered.

## Reduce Risk with Premium Care – Gold Support

Fiber and copper testing tools are mission critical. Premium Care – Gold ensures they're always ready when you need them.

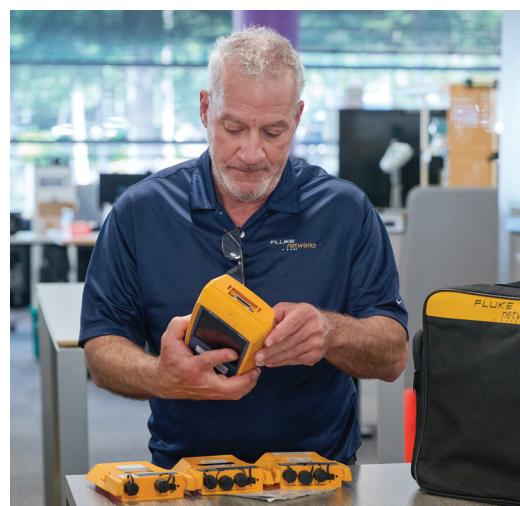

**Gold support reduces total cost of ownership by:**

- Eliminating unexpected service and support charges
- Covering repair or replacement of damaged accessories
- Including annual calibration or performance testing
- Providing loan units to minimize downtime

Less downtime and fewer surprises will give you and your team more confidence on every job.

## PremiumCare

Uptime Protection by

**From extreme environments to everyday installations, Fluke Networks fiber solutions are tested, trusted, and ready for anything.**

- Deliver professional results
- Win more business
- Support the next wave of digital transformation

Discover the fiber solutions that professionals rely on. **Contact Fluke Networks** to learn more.

**Fluke.** Keeping your world up and running.™
