1. INTRODUCTION

1.1. About KVARTA

For more than 10 years, Kvarita has been developing products for Broadcasters and CATV providers. Our devices are used by major radio and television broadcasters and regulatory agencies.

Broadcasting is our passion. We know what you want and we have designed many devices, which are perfectly adapted to your needs. These include RDS encoders, FM Radio monitors and CATV systems. KVARTA has a reputation for excellence and innovation among its clients and partners.

Our CATV, DVB Monitoring devices and RDS/RBDS encoders are growing in popularity due to their reliability, quality and functionality at exceptional prices. All of our products have been designed for professional broadcast use and are fully meet the standards. Our devices incorporate embedded web site and SNMP communication.

1.2. About DVB

Digital Video Broadcasting (DVB) is a suite of internationally accepted open standards for digital television. DVB standards are maintained by the DVB Project, an international industry consortium with more than 270 members, and they are published by a Joint Technical Committee (JTC) of European Telecommunications Standards Institute (ETSI), European Committee for Electrotechnical Standardization (CENELEC) and European Broadcasting Union (EBU).

2. DVB MONITOR Kvarita

2.1.INCLUDED ACCESSORIES

In your package, you should receive:

- Your DVB MONITOR
- Quick start notice
- AC main power cord
- Straight ethernet cable

2.2.GENERAL SPECIFICATIONS OF THE DVB MONITOR

<u>Communication ports</u>	
Ethernet	100baseT – Web Server and UDP/TCP (SNMP/ASCII)
<u>Frequency range and Modulation</u>	
Frequency Range	46 MHz - 1004 MHz
Analog TV	NTSC , PAL/SECAM
Digital TV	DVB-T, DVB-H, DVB-C
<u>Demodulator</u>	
DVB-T	ETSI EN 300 744
DVB-H	ETSI EN 300 744 Annex F
DVB-C	ETSI EN 300 429 and ITU J.83 Annex A/C
Supports	QPSK/16/32/64/128/256QAM
Bandwidth	6MHz/7MHz/8MHz
Symbols rate	1MS/S-7MS/S
COFDM	2k,4k,8k
<u>Measurements</u>	
Standard	ETSI TR 101 290 V1.2.1
Level	30dBuV - 100dBuV (± 2 dBuV)
MER	19dB - 45dB (± 2 dB)
C/N	19dB - 40dB (± 2 dB)
SNR	19dB - 55dB (± 2 dB)
BER (DVB-C)	1E-1~ 1E-7
CBER,VBER (DVB-T)	1E-1~ 1E-7
<u>MPEG Decoding</u>	
Tables	PAT,PMT,SDT,TDT,TOT
Alarms	Service Audio/Video alarms with e-mail notifications and SNMP traps
<u>Monitoring</u>	
Alarms	Carrier count, Level(low, high), SNR(low), C/N(low), MER(low), BER(high), CBER(high), VBER(high), PAT/PMT/Audio/Video missing alarm
Log, E-mail, SNMP traps	Available
<u>Power Supply</u>	
Supply voltage	230V (115V optional)
Voltage tolerance	+/- 10%
Main AC frequency	45-65 Hz
Fuse	0.8A
Consumption	10 VA
<u>Mechanical aspects</u>	
Height	1U (44,5 mm)
Width	483 mm
Depth	220 mm
Net weight	2,5 kg
<u>Info</u>	
Updates	Available
Front panel LEDs	Power supply, LAN, Alarm

2.3. TR101290 OPTION SPECIFICATION

TR101290 Option alarms	
Priority 1 alarms	TS Lock, PAT Interval, Continuity, PMT Interval, Missing PID
Priority 2 alarms	Transport error indicator, CRC, PCR Interval, PTS Interval, CAT
Priority 3 alarms	NIT Interval, SI repetition rate, Unreferenced PID, SDT Interval, EIT Interval, RST, TDT Interval
CA Alarms	ECM Maximum Interval, Scrambling change interval, EMM minimum bitrate

RF Alarms | Service Alarms | SFN Alarms | **TR 101 290** | CA Alarms | Active Alarms

3. Getting connected

3.1. Connecting to the embedded web site

1. Connect the Ethernet cable between the RJ45 and the network.
2. Open a Web browser (Mozilla ,Internet Explorer, ...) and enter the encoder's IP address (Default: **192.168.2.3**) you just set in the previous step. Log in with the default username and password (**admin/admin**). The home page of the embedded web site is displayed:

3. **NOTE:** Your computer should have IP address which is in the same network.

3.2.LED Indication

POWER – Indicates that power supply is available.

LAN – Indicates LAN connection ON/OFF.

ANALOG - Indicates analog reception (blinking indicates parameter out of range or bad reception)

DVB-C - Indicates DVB-C reception (blinking indicates parameter out of range or bad reception)

DVB-T - Indicates DVB-T reception (blinking indicates parameter out of range or bad reception)

3.3.Back panel

Micro SD – 2GB containing configuration and web site files

LAN – Ethernet connection

IN A – RF input A

IN B – RF input B

IEC Connector – AC Power Supply connection 230V (115V optional)

NOTE: COM Port not available in DVB Monitor v2

4. CONFIGURATION AND OPERATION

4.1. STREAMING mode (SCAN OFF) - single carrier measurements and streaming

4.1.1. RF Configuration

- Open the embedded web page and click **DVB -> Config**
- Scan mode should be off as it is in the picture below
- Select the modulation type Analog/DVB-C/DVB-T ¹
- Type the center frequency of the monitored carrier
- Click Save & Tune

- Connect the RF Antenna or CATV source to IN A or IN B
- Select the appropriate Input (A or B) used for the type of modulation Analog/DVB-C/DVB-T
- Configure other relative settings like Bandwidth, Symbol Rate, Constellation and Spectrum.
- Click the Save button below the settings to store the configuration

The screenshot displays the web interface for configuring and monitoring a DVB-T signal. It is divided into several sections:

- Navigation:** A sidebar on the left contains links for IP Config, DVB, Streaming, VIDEO, Constellation, and Installation. The top navigation bar includes Config (selected), Status, Stream, Alarms, and Log.
- RF Configuration:** A section titled 'RF Configuration' shows 'Device mode' set to 'STREAMING (SCAN OFF)'. Below this, 'General' settings are visible, including 'Mode' set to 'DVB-T' and 'Frequency' set to '770 MHz'. 'Save & Tune', 'Prev', and 'Next' buttons are present.
- Signal Measurements:** A large section displays real-time data for 'DVB-T 770 MHz 64QAM 8MHz 8K GI:1/4 Cell ID:1'. A 'LOCK' indicator is shown in green. Metrics include:
 - LEVEL: 58 dBμV (0 to 100 dBμV scale)
 - CNR: 30.2 dB (0 to 45.0 dB scale)
 - MER: 30.5 dB (0 to 45.0 dB scale)
 - CBER: 1.9E-3 (1.0E-1 to 1.0E-7 scale)
 - VBER: <1.0E-7 (1.0E-1 to 1.0E-7 scale)
 - TS Rate: 19.9 MBits (0 to 60.0 MBits scale)
- SFN Measurements:** A section showing 'SFN Measurements: GPS OK MIP OK SFN READY'. It includes:
 - SFN Impulse Response: 13 μs (0 to 100 μs scale)
 - SFN Drift: 0 μs (0 to 100 μs scale)
 - Distance to transmitter: 3 km (0 to 300 km scale)

¹ Depends on the DVB Monitor model

4.1.2. Streaming configuration

- Open the embedded web page and click **DVB -> Stream**
- Select the protocol **UDP/RTP/RTSP/OFF**
- Select the type of MPEG TS : **MPTS** - Multi Program Transport Stream, **SPTS** – Single Program Transport Stream
- For SPTS select up to 5 services on the same frequency to be streamed

* DVB STREAMER * 192.168.2.3 * STREAMING *

4.1.3. RF Measurements

- Checking the status and measured values
- Click **DVB -> Status -> RF Status**
- This web page constantly displays the measured RF parameters – Demodulator lock, FEC Lock, C/N, MER, BER and other measurements depending on the modulation type.

- Click the **DVB-> Status -> MPEG**
- This page displays various MPEG tables PAT , PMT, SDT, TDT, CAT, TOT (Click F5 to reload tables)
- You can also add or remove alarms for specific PIDs in the MPEG transport stream

RF Status | MPEG

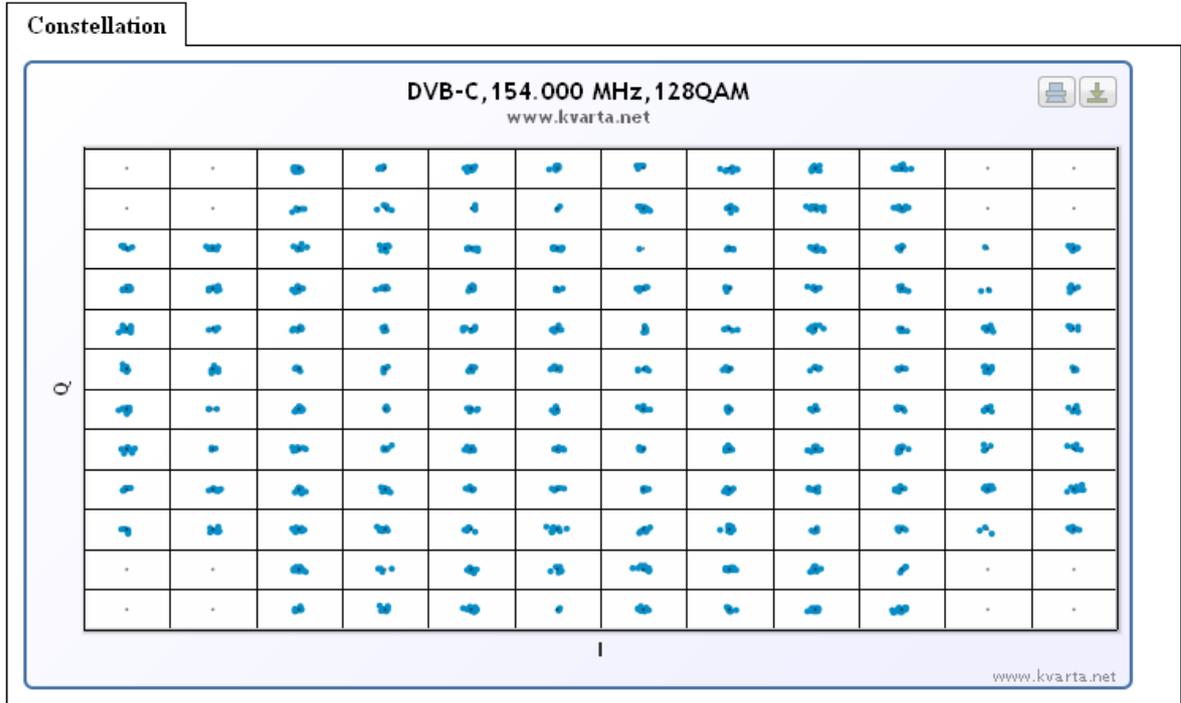

PAT | **PMT** | **MIP** | **SDT** | **EIT** | **NIT** | **TDT** | **TOT** | (REFRESH)

PAT (TS ID: 5500)

4.4. Advanced Configuration

4.4.1. E-mail client configuration

NOTE: DVB Monitor supports Login authentication (no SSL). For assistance, please, contact us.

- Click **E-mail** in the side menu
- Set appropriate SMTP server and authentication configuration
- Configure e-mail parameter and subject (can include alarm text using the macro <ALARM>)

E-mail Configuration

SMTP Client	
SMTP ALARM:	Enabled <input type="button" value="v"/>
Server:	smtp.yourmailserver.com
Port:	587
Authentication:	Enabled <input type="button" value="v"/>
Username:	username
Password:	••••••••
DNS by DHCP:	Enabled <input type="button" value="v"/>
DNS:	8.8.8.8
E-mail	
From:	you@xxx.com
To:	you@xxx.com

<input type="button" value="Save"/> <input type="button" value="Test Message"/>	

4.4.2. SNMP configuration

NOTE: Please, contact us for more support at support@kvarta.net

SNMP Configuration	
SNMP:	Enabled <input type="button" value="v"/>
Read only community:	000000000000
Read write community:	private
Traps server IP:	0.0.0.0
Traps port:	162
Traps community:	public
<input type="button" value="Save"/>	

4.4.3. Programs configuration

- Click **Advanced** -> **Programs** to configure programs.
- programs.m3u can be loaded in VLC for video monitoring
- You can add/edit/delete all parameters for the services found in the multiplex.

Programs	RTSP	Remux	SNMP	VLAN	E-mail
-----------------	------	-------	------	------	--------

Program List Configuration

Program list: programs.txt programs.m3u						
N	Name	SID	Frequency	DVB	Update	Remove
0	BNT 1	4340	154.000	DVB-C ▾	UPDATE	REMOVE
1	bTV	4360	154.000	DVB-C ▾	UPDATE	REMOVE
2	Nova TV	4380	154.000	DVB-C ▾	UPDATE	REMOVE
3	bTV Action	4400	154.000	DVB-C ▾	UPDATE	REMOVE

5	EK Carevec	4440	154.000	DVB-C ▾	UPDATE	REMOVE
6	TV 7	4500	154.000	DVB-C ▾	UPDATE	REMOVE
7		0	100.000	DVB-C ▾	ADD	
						DELETE ALL

4.4.4. RTSP configuration

- Click **Advanced** -> **RTSP** to enter real time streaming protocol specific configuration
- The device URL can be used if the device is behind router
- programs.m3u can be loaded in VLC for video monitoring

NOTE: You should be in Streaming mode and RTSP should be the protocol. Only one RTSP client is supported.

- Click **Charts** in the side menu to view a graphical representation of the RF parameters (works only in scan mode)

5. GLOSSARY

DVB – Digital Video Broadcasting

DVB-C – Digital Video Broadcasting - Cable

DVB-T – Digital Video Broadcasting – Terrestrial

SNMP – Simple Network Management Protocol

SMTP – Simple Mail Transfer Protocol

PID – Packet Identification

PAT – Program Allocation Table

PMT – Program Map Table

NIT – Network Identification Table

TDT – Time and Date Table

TOT – Time Offset Table

SDT – Service Description Table

CAT – Conditional Access Table

APPENDIX A - DVB MONITOR ASCII COMMAND SET

A.1. DEFAULT VALUES

Parameter	Default Value
IP	192.168.2.3
Mask	255.255.255.0
Gateway	192.168.2.1
DHCP	Disabled
Web Server	Enabled
Web Server : <username>,<password>	admin,admin
CT synchronization:	Enabled
Time server IP :	129.6.15.28

A.2. Configuration and special files on the device

- a. **config.ini** - Keeps all configuration information (windows configuration file)
- b. **freq.txt** - Keeps monitoring frequencies (comma separated file)
- c. **programs.txt** - Keeps programs on the device (comma separated file)
- d. **help.txt** - ASCII commands description file
- e. *****.mib** - SNMP MIB file

A.3. ASCII COMMANDS

```
-- *****
-- Device Model: DVB MENTOR 0.05B (10/05/2013)
-- Auto-generated file!
-- Definitions apply to DVB MENTOR
-- Supported ASCII COMMANDS
-- for more information support@kvarta.net
